

Brillo

A Python GUI-based cross-platform app for tabular data processing and visualization.

The underlying "engine" (**brlop** package and other helper scripts) of the app can be run from the Jupyter Notebooks provided.

Dependencies

1. **PyQt5** for GUI functionality
2. **Pandas** for data input, storing, processing and output
3. **Matplotlib** for plotting and visualizing.

Created during a 3-month Erasmus internship at the Jožef Stefan Institute in Ljubljana.

Author: Luka Čubrilo

Mentor: Tadej Rojac

Installation

1. Go to the [releases on this repository](#)
2. Select the newest version
3. Download [UnzipMe.zip](#)
4. Unzip the file
5. Run Brillo.exe

User manual
